Inflation Calculator

\$ 100,000.00

in 1989

has the same
buying power as

\$171,123.39

in 2009

Calculate

[About this calculator](#)

About the CPI Inflation Calculator

The CPI inflation calculator uses the average [Consumer Price Index](#) for a given calendar year. This data represents changes in prices of all goods and services purchased for consumption by urban households. This index value has been calculated every year since 1913. For the current year, the latest monthly index value is used.
